

Job Title: VBA Coder

Job Type: Freelance / Contract

Overview:

We are seeking a skilled Excel programmer with strong experience in VBA (Visual Basic for Applications) and data modeling to support our team with customized, dynamic Excel-based solutions. This role will involve creating and refining Excel spreadsheets, automating processes, developing macros, and providing innovative solutions to streamline data management and reporting.

Responsibilities:

- Design, build, and maintain custom Excel models and templates tailored to project needs.
- Develop complex formulas, macros, and scripts to automate repetitive tasks.
- Implement VBA programming to create advanced functions, enhance user interface, and ensure efficiency.
- Analyze and organize data, translating it into digestible formats.
- Troubleshoot and optimize existing Excel files and processes.
- Work closely with project stakeholders to understand requirements and ensure deliverables meet expectations.

Requirements:

- Proven experience as an Excel Programmer with a strong portfolio of relevant work.
- Proficiency in Excel, including advanced functions, VBA, macros, and data analysis tools.
- Solid understanding of data modeling and best practices for maintaining organized, efficient spreadsheets.
- Strong analytical skills and attention to detail.
- Ability to communicate effectively, ensuring project specifications are met.
- Familiarity with additional data tools (e.g., Power Query, Power Pivot) is a plus.

Deliverables:

- Customized Excel tools and templates per project requirements.
- User-friendly, optimized spreadsheets with documented instructions for usability.
- Troubleshooting support and potential revisions for final deliverables.

Additional Information:

- Flexible work hours and deadlines.
- Opportunity for ongoing projects based on performance and quality.
